

## Runway Contamination

Discussion on how ice, snow, slush, and rain affect aircraft performance for departure and arrivals for hard surface airports and unimproved airport conditions. The discussion will also include FOD and wildlife hazards on and in the vicinity of airports. Many pilots with limited experience neglect using the reports due to not understanding how to read the reports which causes increased risk to their flight operations. However using runway condition reports and knowing how they can be used correctly increases a pilot's ability to safely complete a flight.

**Directions:** Hillsboro Aviation - Troutdale campus, Classroom 1

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.

### Event Details

**Wed, Jun 26, 2013 - 6:00 pm**  
**Hillsboro Aviation / Troutdale**  
**Campus**

911 NW Graham Rd  
Troutdale, OR 97060
